INFORMATION DISCLOSURE STATEMENT

The Examiner is requested to consider reference cited in the corresponding PCT Application procedure for the corresponding PCT Application. In the corresponding PCT procedure, an International Search Report was issued on December 29, 2004. Since this Information Disclosure Statement is being filed with the application, Applicant believes that there is no fee due. However, if there is a fee, please debit the Applicant's account.

- DE 197 30 681 A has been cited in the International Search Report under Category X with regard to the PCT Application claim numbers 1 - 10. This reference discloses a roll setting device including a set of setting elements which exert a setting force on an application roll in the direction toward the form cylinder, and at the same time damp a movement of the roll relative to the form cylinder. This reference is in German and there is no English translation available to Applicant at this time. However, an English abstract is enclosed for review.

- EP 1 155 843 A has been cited in the International Search Report under Category X with regard to the PCT Application claim numbers 1 - 6 and 8 - 10. This reference discloses a device with pivoting arms bearing the inking roller adjustable relative to a friction roller using eccentric bearings and pressed against adjustable stops by spring force to fix its engagement position with a place cylinder. This reference is in German and there is no English equivalent available to the Applicant at this time. However, an English abstract is enclosed for your review.

- DE 93 16 916 U has been cited in the International Search Report under Category A with regard to the PCT Application claim numbers 1, 5 and 7. This reference is in German and there is no English equivalent available to the Applicant at this time.

In addition, Applicant requests review of the reference cited in the specification portion of the disclosure.

DE 198 11 053 A1 discloses a roller placed against at least one counter-roller and mounted on each side in a bearing shell and connected by at least one spring element to a machined frame. No full translation is available at this time, however, attached is an English language abstract.

Consideration of the above references is requested.

Respectfully submitted  
for Applicant,

By:
